Jev Vainsteins

Principal Cyber Security Architect & Strategic Development DACH |
Turning cyber risk into business value
Frankfurt Rhine-Main Metropolitan Area

Summary

Hi, I'm Jev Vainsteins — a Principal Developer, Program Manager, and Cybersecurity & Cloud Transformation leader with 20+ years of experience building, securing, and scaling tech ecosystems across the globe.

I've worked with the best: Amazon AWS, Red Hat, NetApp, Canonical, and Huawei, driving digital transformation, DevSecOps, AI/ML adoption, and open-source innovation for Telecom, Defense, and Enterprise clients.

Core domains:

Cybersecurity (Offensive / Defensive Ops • Zero Trust • SASE • ZTNA • SOC Automation • DevSecOps)

Cloud (AWS • Azure • GCP • Edge • Kubernetes • OpenStack • AI/ML Pipelines)

Software Development (C# • Go • Kotlin • Rust • Scala • Solidity • Angular • Swift • PHP)

Project Leadership (Agile • Scrum • T&T • Change Management • Customer Success)

Whether it's migrating 200+ apps to the cloud, leading 10,000-node edge deployments, or co-founding startups from scratch, I thrive on complex challenges that blend software, hardware, and human problem-solving.

My motto: "Tech should make the world better — not just faster." (And yes, I'm still the David who loves taking on tech Goliaths .) Beyond work, I coach people pro bono who dream of moving to Europe and breaking into high-tech. Helping others level up is my favorite "project" — I've been doing it since 2001.

Fun fact: I once went from a spine injury and +40 kg overweight to full Keto, cardio, and underwater harpoon hunting — becoming 18 years younger in spirit (and wardrobe size XXXL → L).

Let's connect if you're looking for a results-driven, cloud-security-obsessed leader who can deliver, coach, and build future-proof systems from zero to hero.

Experience

Colt Technology Services

Cyber Security Client Partner

February 2026 - Present (6 months)

Frankfurt

I drive enterprise growth across Germany, Switzerland and Austria through Network & Cybersecurity transformation (SD-WAN / SASE / SSE) — and I build the intelligence tooling that wins the room.

I hold matrix responsibility for 35+ Account Executives across DACH, advising CIOs, CISOs and executives and translating technology into business value, from discovery to close.

What I've built, not just sold:

- Stratos — a passive external-attack-surface platform that maps a customer's real internet-facing estate before the first meeting, turning discovery into hard evidence.
- C-BIQ (Cyber Business Impact Quantification) — a board-ready model that prices cyber risk in euros, moving the conversation from fear to finance.
- GEOPOL (Geopolitical Cyber Threat Assessment) — a national-authority-grade product naming the adversaries, the CVEs and the geopolitics behind them, built to feed DORA / TIBER-EU testing.
- ELECTRONIC LLM — two zero-trust AI agents (LLM-powered) that put Stratos, C-BIQ and GEOPOL into every AE's hands. One command runs the recon, prices the risk, names the adversaries and generates four board-ready decks in minutes, not weeks — intelligence-led selling as a self-serve AE capability.

These turn a vendor pitch into a consultative engagement: we show enterprises what they expose, what it would cost, and who is coming for them.

What I do:

- Lead technology strategy, solutioning and executive engagement on high-value engagements
- Orchestrate Sales, Product, Delivery and Partners into winning proposals, owning pricing and commercials

Partner & Ecosystem (PSF): Fortinet, Zscaler, Versa, Cisco, Palo Alto and others — vendor-neutral SASE / SD-WAN / Security aligned to Colt's Partner Solutions Framework.

Core strengths: Enterprise Sales · MEDDPICC · SASE / SD-WAN ·

Cybersecurity · Threat Intelligence · AI Agents / LLM Tooling · Product

Creation · Strategic Accounts · Deal Leadership · Executive Engagement

Stars4business OU

Founder, Principal Developer, Principal Architect Cybersecurity/
OpenSource/Cloud T&T, BD, PM

February 2019 - February 2026 (7 years 1 month)

Germany

GenAI: OpenAI, #Antropic, #Llama, #Gemini and Nvidia

Blockchain: Smart Contracts, Protocols, Investment Platforms

Programming: Java, Python, Javascript, C#, Go, Kotlin, Solodity, Rust

AWS, Azure, Google Cloud, SD-WAN, SASE, Zero Trust, AI/ML, SIEM,

Endpoint Protection, DLP, IAM, SWG, CASB, FWaaS, Network Firewalls,

AWS: EC2, Lambda, S3, RDS, DynamoDB, Redshift, SageMaker, Kinesis,

Elastic Beanstalk, Fargate, CloudFront, VPC, IAM, GuardDuty, CloudWatch,

Glue, EFS, Backup, Aurora, EBS, Snowball, DocumentDB, Keyspaces, Shield,

CloudTrail, OpsWorks.

Azure: VMs, App Service, Blob Storage, Azure SQL, Cosmos DB, Synapse,

Machine Learning, Stream Analytics, Service Fabric, Container Instances,

CDN, Active Directory, Security Center, Logic Apps, Azure Arc, Batch,

Functions, Monitor, Key Vault, Redis Cache, Data Lake, Site Recovery, Event

Grid, Front Door, Data Factory.

GCP: Compute Engine, App Engine, BigQuery, Cloud Storage, Cloud SQL,

Spanner, AI Platform, Cloud Functions, CDN, VPC, IAM, Security Command

Center, Monitoring, Dataflow, Firestore, Pub/Sub, GKE, Persistent Disk,

Memorystore, Cloud Run, AutoML, Transfer Appliance, Armor, Endpoints,

Data Catalog.

Linux & Networking Skills

Linux proficiency across Red Hat (RHEL, OpenShift, Ansible) and Canonical
(Ubuntu, MAAS, Juju). Skilled in OpenStack for cloud infrastructure and

Kubernetes for container orchestration. Networking expertise includes Cisco

technologies such as routers, switches, SD-WAN, VPNs, and firewalls,

enhancing security and connectivity for enterprise

ZEDEDA

Principal Technical Account Manager

May 2025 - September 2025 (5 months)

Germany

At ZEDEDA, I led one of the world's largest automotive edge-computing deployments, orchestrating over 10,000 edge points of presence across 140+ countries.

I worked at the intersection of Edge, Cloud, and Security, driving large-scale rollout and lifecycle management using K3s-based orchestration, EVE-OS, and Fortinet Secure SD-WAN integrations.

My focus was on end-to-end edge orchestration, IoT connectivity, and global scalability, enabling secure, automated software delivery and real-time observability across distributed environments.

I was deeply involved in technical discussions of future architecture, observability improvements, and enhanced application lifecycle management, ensuring better resilience, performance, and manageability at scale.

Intellexa

Principal Cyber Security Technical Customer Success Manager

January 2024 - October 2024 (10 months)

Germany

I work with law enforcement agencies on a variety of cybersecurity initiatives, focusing on strengthening security frameworks and enhancing digital resilience through advanced technology deployments.

Cybersecurity Skills: Offensive CyberSecurity, Red Teaming, Blue Teaming, Purple Teaming, Threat Intelligence, Threat Hunting, Penetration Testing, Vulnerability Assessment, Incident Response, Forensics, Malware Analysis, 1-Click Exploits, Zero-Click Exploits, Threat Modeling, Security Architecture, Security Auditing, Compliance Management, Governance, Risk Management, Mitre ATT&CK Framework, NIST Cybersecurity Framework, ISO 27001, SOC 2, PCI-DSS, GDPR Compliance, HIPAA Compliance, Data Privacy, DPI (Deep Packet Inspection), IDS/IPS (Intrusion Detection/Prevention Systems), Firewalls, Web Application Firewalls (WAF), SIEM (Security Information and Event Management), SOAR (Security Orchestration, Automation, and Response), XDR (Extended Detection and Response), EDR (Endpoint Detection and Response), NDR (Network Detection and Response), UBA/UEBA (User and Entity Behavior Analytics), IAM (Identity and Access Management), PAM (Privileged Access Management), CASB (Cloud Access Security Broker), DLP (Data Loss Prevention), SASE (Secure Access Service Edge), ZTNA (Zero Trust Network Access), Zero Trust Architecture, Microsegmentation, Cloud Security, Cloud Security Posture Management (CSPM), Cloud Workload Protection (CWP), Secure DevOps (DevSecOps),

Container Security, Kubernetes Security, Application Security, Mobile Security, Endpoint Security, Ransomware Protection, Phishing Protection, Email Security, Network Security, Secure Web Gateway (SWG), Anti-virus/ Anti-malware, Mobile Device Management (MDM), Patch Management, Vulnerability Management, DNS Security, Web Security, Content Filtering, Secure SD-WAN, VPN, TLS/SSL Encryption, Public Key Infrastructure (PKI), Cryptography, Quantum Security, Biometric Security, Behavioral Analytics, Honeypots/Honeynets,

Amazon Web Services (AWS)

Senior Customer Solutions Manager Telecom

December 2021 - July 2024 (2 years 8 months)

Pinneberg, Schleswig-Holstein, Germany

As a Senior Customer Solutions Manager at AWS, I was responsible for managing the lifecycle of complex customer transformation programs, driving timely impact in both pre-sales and migration. I led teams across various functions to enable adoption and migration, ensuring we tracked progress effectively and delivered results.

I led architectural solution reviews to ensure adherence to best practices, while building strategic relationships with senior customers, understanding their long-term objectives and navigating business and technical constraints. My work involved applying acceleration mechanisms by conducting discovery, designing efficient adoption plans, identifying potential gaps, and addressing customer business problems.

I collaborated closely with AWS service teams to meet critical customer requirements, proactively mitigating adoption risks before they escalated. By regularly reviewing metrics and migration statuses with senior leaders, I ensured that plans matched business cases, always applying sound technical judgment to test assumptions and refine proposals.

The solutions I recommended were inventive, scalable, and maintainable, with a focus on practical implementation trade-offs. I consistently streamlined processes to avoid barriers to innovation, ensuring seamless migrations for my customers. Additionally, I optimized internal documentation and mechanisms, improving team efficiency and driving operational excellence.

I also shared best practices publicly and wrote effective narratives to help both internal and external senior leaders make informed decisions. Throughout

my tenure, I actively provided feedback and contributed to the promotion of operational excellence across teams.

Tosca

Transition & Transformation Project Manager

July 2021 - May 2023 (1 year 11 months)

Germany

- Led post M&A Technological Transition & Transformation Program Management for 3 companies, consolidating IT systems into a single platform in the DACH Region.
- Managed application digital transformation migration to Microsoft Azure, including ERP system consolidation and long-term migration to Microsoft Dynamics + IOT Industry 4.0.
- Defined SDLC sprints, QA cycles, and integrations while working with Azure DevOps.

Enea Openwave

Principal Project Manager

August 2020 - December 2021 (1 year 5 months)

Germany

As a project manager, I led a large-scale digital transformation project in Deutsche Telekom, delivering customer software within 12 months and managing a 24 million Euro budget. I was responsible for the following tasks:

- Leading a team of cross-functional work streams, including SDM database, architecture, data modeling, OSS, automation CI/CD, acceptance testing, migration, and cloud infrastructure.
- Implementing agile project management methodologies, ensuring efficient resource allocation, sprint planning, and quality delivery according to customer requirements.
- Coordinating and managing resources across different teams, such as QA, architects, R&D teams in India and Croatia, and product management teams.
- Communicating and updating stakeholders regularly on project progress, features, and deliverables, maintaining transparency and alignment with customer expectations.
- Managing customer relationships and satisfaction, addressing their evolving needs through effective communication and proactive problem-solving.
- Creating and executing customer success management plans and reports, maximizing project efficiency and resolving any gaps or challenges.

- Identifying and addressing changes in customer needs, creating change requests and implementing strategies to improve project planning and delivery.
- Facilitating continuous improvement through lesson learned sessions and the implementation of strategy improvements, optimizing project outcomes and customer satisfaction.
- Optimizing R&D resources to meet tight project timelines and deliver high-quality results.

NetApp

Global Cloud Architect

February 2020 - November 2021 (1 year 10 months)

Germany

Acting as a design partner for business and architectural leaders.

Supporting cloud strategies, digital transformation, and business model development.

Working on business case/requirements development and mapping these to NetApp Solutions, Services, and Products.

Incubating new technologies with forward-thinking customers.

Transforming sales strategies into execution plans.

Creating architectures and solutions.

Moderating cross-functional technical teams.

Red Hat

Principal NFV Telecom Manager

April 2019 - August 2020 (1 year 5 months)

Germany

Led the successful execution of the largest digital transformation projects for two Tier 1 telecom operators, DT Group and Orange, resulting in significant improvements in operational efficiency and customer satisfaction.

Managed a portfolio of 26 projects, including vEPC, vIMS, SDN, SDWAN, Openshift Kubernetes, and IT clouds, ensuring timely delivery and adherence to project milestones.

Collaborated closely with cross-functional teams, including PMO and NFV/SDN, to drive customer success and achieve project objectives.

Developed and implemented customer success strategies, resulting in increased adoption and utilization of Redhat's products and services.

Provided expert guidance and support to customers, addressing their technical challenges and ensuring smooth implementation and integration of solutions.

Maintained clear and effective communication with stakeholders, avoiding industry jargon and explaining complex concepts in a comprehensible manner.

Ensured consistency and accuracy in all customer communications and documentation, proofreading for errors and typos.

Demonstrated a deep understanding of Kubernetes and cloud technologies, leveraging them to drive successful customer outcomes.

Canonical Ltd.

2 years 7 months

Director Sales Business Development

April 2017 - November 2018 (1 year 8 months)

Düsseldorf Area, Germany

Bus Dev & Sales of Ubuntu Cloud product line : NFV Telco Platform, Private/ Public Cloud, Containers, PaaS. Bare Metal Provisioning tools, SDN, DevOps, Digital Transformation for Defence, Telecom and Enterprise, CaaS, FaaS, OpenStack, Kubernetes

Business Development Director Certified Public Cloud EMEA & APAC

May 2016 - November 2018 (2 years 7 months)

Düsseldorf Area, Germany

- Leading the engagement at a senior level with new global providers and secure new partnerships with them for Ubuntu products.
- Working extensively with partners to drive up the usage of Ubuntu OS guest images and associated support services and tooling
- Working collaboratively with other teams to inform, influence and represent cloud-related initiatives that improve developer experiences with Ubuntu across the company and with partners

Enecuum ENQ

CBDO

April 2018 - October 2018 (7 months)

Düsseldorf Area, Germany

Responsible for Investor relations, Global Sales and BD Strategy of Blockchain Enecuum protocol

SIA Enterfreelance

Founder, BD Director and Senior Technical Director

June 2013 - September 2016 (3 years 4 months)

Riga, Latvia

- Sales of advanced cloud and internet services
- Sales of Fiber optic transmission equipment DWDM/CDWM
- Sales of Datacenter core products
- Sales of outsourcing consulting projects

- Sales & Business Consulting concerning Document Management system integration for eGOV & Enterprise .
- Sales & Business Consulting concerning BSS systems in Telco.
- Sales & Business Consulting concerning SIGINT Law enforcement ICT intelligence systems in Africa.

Region responsibility: EMEA

Huawei Technologies

Senior Solutions Sales Manager IT, NFV, BigData EMEA, HUAWEI Global Solution Elite Team

October 2014 - May 2016 (1 year 8 months)

Successfully sold and implemented IT/Datacenter/OpenStack Cloud/NFV/PaaS/BigData solutions to key Carrier Telco customers, resulting in significant revenue growth and customer satisfaction.

Designed customized solutions for clients, leveraging expertise in virtualization of Mobile and Fixed Telecom networks, meeting their specific needs and requirements.

Led a team of presale professionals, providing guidance and support to achieve sales targets and exceed customer expectations.

Developed and maintained strong relationships with key clients, ensuring long-term partnerships and repeat business.

Effectively communicated the value proposition of our solutions, using clear and concise language that resonated with both technical and non-technical stakeholders.

Evolving Systems

Program Manager

June 2013 - June 2014 (1 year 1 month)

Contractor Program Manager in Moscow Russia (MTS Account) for a NASDAQ listed wireless software company providing provisioning, subscriber activation and service management, and M2M (machine to machine) management solutions to the mobile market globally.

The Solutions Consultant (SC) is a senior member of our Solutions Consulting Team. The SC has primary responsibility for the technical relationship with prospects and clients, and oversees technical account activities, including presales, requirements definition, solution proposals, solution deployment, scope control, and change management. The SC also orchestrates the efforts of internal groups, third party partners, and customer stakeholders, to achieve high levels of customer satisfaction.

Cogent Communications

Presale & Sales Engineering IPTransit, Cloud Computing, Data Center, MPLS

July 2011 - June 2013 (2 years)

Frankfurt, Germany

- Responsibility for Technical Account Management, Sales Engineering, Presale for Tier1 ISP number 5 in the world, Number 3 in EU and Number 3 in USA. Fields of expertise: Collocation, Data centers, L3 Ethernet over DWDM connectivity, L1 Metro and Cross country Waves, L2 Ethernet over MPLS VPN, Transatlantic branched MPLS connectivity, Leased server solutions and IaaS.
- Main customers: International Internet Service Providers, Cellular Mobile Operators, Cable Providers, Financial Institutions, OIL&Gas companies, Enterprise customers, Cloud Providers, VOIP Providers, WEB2.0 companies, Education sector, Hi-Tech & Start-UP companies.
- I'm Responsible Technologically for 12 Global Account Managers.
Develop technical responses and strategy for RFIs and RFPs
Attend sales and vendor calls, telephonically and in-person
Provide technical Presale consulting both internally to Global Account Managers and externally to customers.
Administer technical training and guidance to Sales managers.
Matrix coordination between internal departments: IP Eng, Abuse, Field Engineers, NOC, Provisioning.
- Ensure correct technical content of all customer orders
Design customer technical solutions with engineering diagrams
Understand technical limitations and advantages of Tier 1 ISP services.
- Responsibility for communications services Project delivery from the KOM till SAT.
- Communication with Carrier Neutral Data centers around EU, and responsibility to lit and recommend new Data centers to be added to Cogent network.

Mobotix AG

Presale & Postsale responsible for CIS countries

September 2010 - July 2011 (11 months)

Langmeil, Germany

- * Complete Technical Presale responsibilities for CIS countries.
- * Technical relationship with key Mobotix Distributors in CIS
- * Complete Senior Postsale responsibilities for Projects in CIS, EMEA and North America.

- * Architecture planning based on Mobotix IP cameras for big projects in CIS and rest of the world including: switching equipment, storage, routing, NOC monitoring center etc...
- * Technical Presale activities during Mobotix events and exhibitions in CIS such as: SST Moscow TBFORUM, MIPS, SIPS Krasnodar, Mobotix National Partner conference in Saint Petersburg.
- * Preparation of CISCO Webex remote training materials based on Mobotix equipment for CIS and the rest of the world.
- Project planning and guidance for IP CCTV Safe city and big CCTV projects 400+ cameras.
- Full planning of end to end CCTV IP solutions based on NAS/SAN: QNAP, Overland, Synology, Netgear. POE Switches: Netgear, Trendnet, D-Link, Cisco, MRV, HP. Servers & PC's for monitoring
- Working with multiple Parallels visualization platforms
- Entire IT and Presale/Postsale operations running on Apple Mac product line

WaveIP

Professional Services Manager

April 2010 - September 2010 (6 months)

Israel

Professional Services Manager responsible for all technical aspects of Wireless equipment of WaveIP and managing team of professional services and support in WaveIP.

Wave IP is a vendor of Wireless PTP and PTMP OFDM equipment similar to Alvarion or Motorola Canopy, Radwin.

Responsible also for Market penetration in Russia & CIS.

Telmap (An Intel Company)

Project Manager

November 2009 - April 2010 (6 months)

Israel

Presale and Project Management of Telmap products to Mobile Operators such as: MTS Russia, Vodafone NL, Orange Group, Airtel India.

Project Management responsibilities starting from initial stages of the project till the stages of project monitoring and SLA after project delivery: Technological Definition of project deliverables, R&D Project Management of R&D teams internally, in order to create new features and new products according to Tier 1 Mobile Operators requests.

Starhome (A Comverse company)

Technical Account Manager

February 2009 - November 2009 (10 months)

Israel

- Responsibility for Technical VAS Account Management , Presale & Project Management to Tier 1-2 GSM MO's in CIS countries, Baltic States, (MTS Russia, Vimpelcom Russia, Elisa Finland, Elisa Estonia, Bite Lithuania, MTS Armenia, MTS Ukraine, etc...)
- Presale: Taking responsibility on the MO during the initial stages of Presale. Due to very sophisticated Product Portfolio Presale stages require high technological knowledge in terms of GSM/3G/IP in order to provide correct product definition and technological architecture to the Mobile Operator.
- Responsibility for Technological definitions and architecture stages of the Project together with other associates: Networking Experts, System Architects, R&D, QA, Deployment Engineers.
- Project Management: Project Management responsibilities starting from initial stages of the project till the stages of project monitoring and SLA after project delivery: Technological Definition of project deliverables, R&D Project Management of R&D teams internally, in order to create new features and new products according to Tier 1 Mobile Operators requests. Tender Management of RFI/RFP VAS services for Tier1 Mobile Operators, Product delivery management in terms of logistics, shipping, customs. Management of Deployment & System configuration resources. Management of QA teams both for internal R&D projects and for external ATP finalization after product integration in Mobile Operator's environment. Management of legal resources in order to finalize the delivery of the project and to provide to Mobile Operator full scope of deliverables, support terms, licensing upgrades and other project aspects. Management of Post Sale technical support resources according to SLA for ongoing projects.

ComServe LR GROUP

Project Manager

March 2007 - January 2009 (1 year 11 months)

Luanda Angola

- Project responsibility for Wimax projects in Angola
Alvarion and Bridgewater Wimax 802.16d project for MStelcom in Angola.
<http://www.mstelcom.co.ao>
OIL & Gas Industry Wimax project for Largest Oil company in Angola,
SonAngol <http://www.sonangol.co.ao/>

- Project Management of Tadiran RF Spectrum and Radio license administration project for the Angolian ministry of telecommunications. <http://www.inacom.og.ao>
- Pre sale proposal and effort estimate.
- Project review with implementation solution.
- CDR meeting – Customer expectation coordination.
- Planning Development capabilities and integration activities.
- Decision making while making business proposals
- Multi Million Consulting, Business Development, Sales & Project Management activities, dealing with Sales proposals and consultation related activities to Key Accounts and Carriers (Wimax, Security, Video Conference, Enterprise Video Surveillance, Infrastructure, Voice, RF & Networking,)
- Strategy planning for a line of business within enterprise costumers.
- Assisting in the creation of the overall account plan with Enterprise Sales and Premier Deployment and Support Services.

Extricom

Field Application Engineer

January 2006 - January 2007 (1 year 1 month)

Israel

- o Provide Extricom customers with 3rd level of Technical Support.
- o Handle Critical and high priority issues.
- o Responsibility to resolve all issues with and without the help of R&D.
- o Provide on-site support when required.
- o Train 1st and 2nd level on technical issues.
- o Write white papers on new environment when applicable.
- o Write knowledge base solutions to be used by colleagues and customers.
- o Presale presentations to Key Telco's, Integrators, Distributors, Enterprise Clients.
- o WLAN Analysis of 802.11b/g/a (Ethereal, AeroPeek, TCP DUMP)
- o Vendor Specific Test plan passing for Technological Partnership acceptance (Ascom, Spectralink, Vocera, Kineto Wireless).
- o Technological Partnership & OEM related activities (Ascom, Spectralink, Vocera, Kineto Wireless, ECI, Aeroscout, Alcatel and others)
- o Professional Services consulting and analysis for Carriers and Key Accounts

Verint (A Comverse company)

SIGINT Integrator & Technical Support Engineer Tier 2

February 2005 - January 2007 (2 years)

Israel

- Project deployment & integration on client's site abroad of voice/fax/internet interception systems
- On site technical support to Enterprise clients
- Client's advanced on site training abroad related to system installation and maintenance of sophisticated intelligence telecommunication systems
- Technical writing on mandatory preliminary preparations on client's site before integration (Site Preparation Guides, Site Surveys pre requirement for telecom equipment integration, Deployment Plan Documents)
- Responsibility for Project Delivery (Working side by side with QA and R&D in order to accomplish integration and project delivery)
- Matrix Technical Management of Verint or Subcontractor Field Support/ Deployment Engineers on client's site abroad.
- Familiarity with the Russian current culture and internal politics
- Knowledge of training methodologies and technologies.
- OIL & Gas IT & Telecom project for 18th Largest OIL company in the world LUKOIL. http://www.lukoil.com/static_6_5id_29_.html

D-Link

Technical Country Manager local CTO Level

February 2003 - January 2005 (2 years)

Israel

D-Link Taiwanese vendor and one of the leading Networking vendors in the world for switches, routers, and approximately 300 different networking product lines.

- Post sale Tear 2-3 Support
- Staff Supervision
- Presale Technical Support to Distributors, Resellers, OEM's, Carriers and SMB integration companies.
- RFI/RFP response (Tele-Data, HOT, Bezeq, Gilat etc...)
- Product & Project Management (Bezeq, HOT, 012, 013 etc...)
- Technical Support & Training, D-Link companies & resellers (Routers, WIFI products, Print Servers, Video Phones, Security Cameras, Bluetooth products, FXS-VoIP phones and residential gateways PDA products, etc)
- Technical Support & Training ,Infrastructure providers (ADSL, Cable) ,ISP's and other communication hi-tech corporations
- Product Firmware Testing, Hardware QA & data verification with HQ.

Bezeq International

Wireless Telecommunications Support Specialist

January 2001 - January 2003 (2 years 1 month)

Israel

- Private & Business Customers wireless networks installation & maintenance (D-Link, 3COM, 2Wire, Askey, Billion, Vigor)

- Business Customers Installation & maintenance, hardware based firewalls (Checkpoint S-BOX, Zyxtel)

- Postsale Technical Support for home users of Internet connectivity (ADSL, ISDN, Cable, 56K Modem)

Education

Champlain College

B.Sc, Academic Program in Computer Sciences · (2001 - 2003)

The Technological School for Naval Officers, ORT Ashdod.

Associate of Science - AS, Electronics & Cyber · (September 1995 - September 2000)

Champlain College
